

PROACTIVE

MICRO PELLETS AND EXTRUDED PELLETS FOR THE POST-WEANING AND PRE-FATTENING OF STURGEON

Micro pellets and extruded pellets for the post-weaning and pre-fattening of farmed sturgeon. Raw materials with high digestibility ensure high palatability and harmonic growth, with high performances. Particular attention was given to the inclusion of functional products that ensure intestinal and liver health, both particularly important in this breeding phase.
